

*Producing Great Sound for Film and Video*  
Third Edition  
Jay Rose, C.A.S.  
Focal Press, 2008  
ISBN 978-0-240-80970-0

# Contents

	<i>Acknowledgments</i>	<i>xi</i>
	<i>Introduction</i>	<i>xiii</i>
	<i>About This Book and Audio Postproduction</i>	<i>xv</i>
<b>Section I</b>	<b>Audio Basics</b>	<b>1</b>
Chapter 1	<b>How Sound Works</b>	<b>3</b>
	Music-Sicle?	3
	The Life of a Sound	4
	Everybody Feels The Pressure	4
	It Matters How Frequently You Do It	5
	Fast Pressure Changes are Heard as Sounds	5
	Harmonics	5
	Unpitched Sounds	8
	The Myths of Frequency Response	8
	Somewhat Slower Pressure Changes are Heard	
	As Envelopes	9
	When Envelopes and Frequencies Overlap	11
	Slow Changes of Pressure are Loudness	11
	The Need for a Reference	12
	The Logarithm	12
	The Decibel	13
	The Speed of Sound Makes a Big Difference	14
	Echoes and Colorations	14
	Echoes in Small Rooms	15
	The Inverse-Square Law	17
	“Soundproofing”	18
	Very Slow Changes of Pressure are Weather	19
Chapter 2	<b>How Digital Audio Works</b>	<b>20</b>
	Why Digital?	20
	We Don’t Use Digital Audio Because It’s Nonlinear; We	
	Use It Because It’s Robust	21
	Digital Audio Hides Its Mistakes	22

	Turning Analog to Digital	23
	Sample Depth	24
	Sample Rate	31
	Audio Data Reduction	36
	Delta Encoding	36
	Lossless Encoding	37
	Perceptual Encoding and Masking	37
	Copy Protection	40
Chapter 3	<b>Audio on a Wire</b>	<b>41</b>
	Analog Wiring	41
	Ohm's Law	42
	Setting the Standard	43
	Nominal Levels	44
	Level and Dynamic Range	45
	Cross-Connecting -10 dBV and +4 dBu Equipment	46
	Noise on the Line	46
	Balanced Wiring	48
	You Can't Tell a Wire by Its Connector	49
	Cross-Connecting Balanced and Unbalanced Wiring	50
	Fancy Wiring?	51
	Digital Wiring	54
	Digital Audio Wiring Standards	54
	Other Formats	55
	Cross-Connecting Digital Formats	57
	Digital Audio Errors	58
<b>Section II</b>	<b>Planning and Prepro</b>	<b>59</b>
Chapter 4	<b>Planning for Sound</b>	<b>61</b>
	The Need for Sound	61
	People are Conditioned to Expect Good Sound	62
	Wisely Invested Time Can Save a Lot of Money	63
	Think About The Overall Track	65
	Start with the Script	65
	It's Not Just the Writer's Responsibility	67
	Make Room for Sound	69
	Provide Texture Changes	70
	Remember the Medium	70
	Planning and the Bottom Line	72
	Elements of the Soundtrack	72
	Spoken Words	72
	On-Camera Dialog	72
	Crowd Voices	74
	Voice-Over Narration	75
	Voices are Usually Mono	76
	Protect the Center	76

	Music	77
	Source Music	77
	Scoring	77
	The Pitfalls of Popular Music	79
	Sound Effects	80
	Sound Effects Categories	80
	Special Effects and Processing	81
	The Layers of a Track	82
Chapter 5	<b>Budgeting, Scheduling, and Preproduction</b>	<b>83</b>
	Budgeting for Sound	84
	Production Costs	84
	Voice-Over Recording	87
	Postproduction Costs	88
	Allow Time for Sound	90
	Preproduction Time	90
	Time Requirements at the Shoot	91
	Postproduction Time	92
	Checking Locations	95
	Potential Problems	95
	Location Considerations for Special Situations	99
<b>Section III</b>	<b>Production Sound</b>	<b>103</b>
Chapter 6	<b>Microphones and Room Acoustics</b>	<b>105</b>
	About Microphones	106
	Types of Microphones	107
	Microphone Directionality	108
	Real-World Patterns	114
	Types of Pickup	118
	Powering a Mic	122
	Microphone Settings	124
	Rooms and Recording	125
	Testing the Space	125
	Cutting Down Reflections	126
	Be Flexible	127
Chapter 7	<b>Production Mic Technique</b>	<b>128</b>
	What Kind of Mic to Use?	129
	Using Boom Mics	130
	Choose Boomer and Boom	131
	Gear for Booming	132
	The Art of Going Boom	134
	Operating the Boom	137
	Using Lavalieres	140
	Types of Lavs	140
	Mounting Lavalieres	141

	Pin-Mic	143
	Avoiding Noise in Lavalieres	144
	Head-Worn Mics	145
	Planted Mics	145
	Controlling Wind Noise	146
	Using Wireless	147
	Buying Wireless	149
	Using a Wireless	153
	When Wireless Goes Bad	155
	Room Tone	156
Chapter 8	<b>Production Recording</b>	<b>157</b>
	Getting Audio Into a Recorder	157
	Single and Double System	157
	“XLR” and “Mini-Jack”	158
	Balancing Adapters	158
	Active Adapters	159
	About Mini-Jacks	161
	Avoiding Noise	162
	Impedance	162
	Camera Settings	164
	Camcorder Audio Quality	164
	What We Learned	166
	The Recommendations	166
	Bottom Line on Digital Camcorders	171
	Double System	172
	Syncing Double System	173
	Using DATs (Digital Audio Tapes)	175
	MiniDisc	175
	Hard Drive and Flash RAM Recorders	176
	Computer	177
	Mixers and Preamps	177
	Preamps	177
	Basic Mixer	178
	Connecting to the Recorder	179
	Adjusting the Volume	181
	Aligning the Mixer’s Meters	182
	Headphone Amplifiers	183
Chapter 9	<b>Recording Voice-Overs, ADR, and Effects</b>	<b>184</b>
	The Voice-Over	184
	Engineering a Voice Recording	185
	Session Planning	185
	The Recording Session	191
	Recording Narration to Picture	192
	Dialog Replacement	193

	Directing The Voice-over	195
	Casting and Talent Unions	195
	Planning Ahead	199
	At the Session	202
	Directing Children	205
	Recording Sound Effects	206
	Foley	206
	Recording Ambiences	210
	Vocal Sound Effects	211
<b>Section IV</b>	<b>Postproduction</b>	<b>215</b>
Chapter 10	<b>Postproduction Workflow</b>	<b>217</b>
	Linear and Nonlinear Editing	217
	Linear Editing	218
	Nonlinear Editing	218
	Linear versus Nonlinear for Video Editing	219
	Implications for Audio	220
	Audio Options Beyond the NLE	221
	Moving Your Project Between NLE and DAW	222
	Film vs. Video Workflows	226
	Organizing Postproduction Audio	227
	Dealing with Non-Sync Audio	228
	Audio Priorities	229
	Mixing and Editing are Separate Functions	230
Chapter 11	<b>Postproduction Hardware</b>	<b>232</b>
	Monitoring	232
	Editing Room Acoustics: When Good Speakers Go Bad	233
	Choosing Monitor Speakers	236
	Choosing an Amplifier	240
	Monitor Controller	242
	Computer Input/Output	243
	Sound Cards	243
	USB/FireWire Input Devices	243
	The Mixer	244
	Computerized Mixing	245
	Audio Sources and Recorders	249
	Other Handy Gear	251
	Moving Signals Around the Editing Suite	254
	The Patchbay	255
	Switchers and Routers	256
	Wiring The Postproduction Suite	256
	Practical Ground-Loop Elimination	257
	Wiring Monitor Speakers	258

	Mixing -10 Dbv and +4 Dbu Equipment	259
	Impedance Matching	260
	Nonaudio Wiring	260
Chapter 12	<b>Levels and Digitizing</b>	<b>263</b>
	Digital Audio Transfers	264
	When Digitizing Isn't	264
	FireWire and Other Data Transfers	265
	Transfer via Digital Audio	268
	Digital Audio Processors	271
	Digitizing Analog Signals	271
	Gain-Staging	272
	Getting Better Inputs	273
	Calibrating an NLE's Meters	274
	Diagnosing Level Problems	277
	Metering and Lineup Tones	278
	VU Meters	278
	Digital Metering in Software	280
	How Much Is Zero?	283
	Synchronization	283
	Understanding Timecode	284
	Timecode Recording and Transmission	287
	Syncing Film with Audio	288
Chapter 13	<b>Editing Voices</b>	<b>293</b>
	The Right Tools for Editing Voice	294
	Scrubbing, Jogging, and Shuttling	295
	What, No Scrub?	295
	Editing I: Cutting in Silences	296
	Editing II: Sounds with Hard Attacks	297
	An Editing Exercise: Cutting Where There's No Pause	298
	Editing III: Hearing Phonemes	300
	An Even More Impressive Exercise	300
	Fooling the Ear	301
	Phonemes Come in Families	301
	Intonation	304
	Projection Levels	305
	Editing IV: Theatrical Film Dialog	305
	Track Splitting	306
	Editing V: The Tricks	308
	Breathless	308
	Simply Shocking!	308
	Extensions	309
	Snap, Crackle . . .	309
	Editing VI: Keeping Track of Sync	309
	Parallel Track Operations	311
	Sync Problems	312
	A Final Exercise	313

Chapter 14	<b>Working with Music</b>	<b>314</b>
	Deciding What Music You'll Need	315
	Source Music	316
	Sources of Music	317
	Original Music	317
	Formerly Original Music	318
	Other Forms of Stock Music	323
	MIDI Music	323
	Non-Library Recordings	325
	Mix and Match	328
	Selecting Music from a Library	328
	Music Editing	330
	Learn to Trust Your Ears	330
	Learn to Count	331
	Cutting by Counting	333
	Matching Picture	337
Chapter 15	<b>Sound Effects</b>	<b>339</b>
	We Don't Need No Stinkin' Reality	339
	Sources for Sound Effects	341
	Where Not to Get Effects	342
	Professional CD Libraries	342
	CD-ROM Libraries	343
	SFX on the Internet	343
	Rolling Your Own	343
	Choosing Effects	344
	Placing Sound Effects	345
	Planning Effects	346
	Backgrounds	347
	Adding Hard Effects	349
Chapter 16	<b>Processing</b>	<b>352</b>
	How any Effect can Wreck a Sound	353
	Watch Out for Overloads	353
	Watch Out for Sounds That Are Too Soft	353
	Use Good Monitors	353
	Presets . . . Friend or Foe?	354
	When to Apply Processing	354
	Equalizers	356
	Equalizer Types	357
	Learning the Bands	361
	Overequalization	362
	Equalizer Tips	362
	Compressors	363
	What Happens Inside a Compressor	363
	Using the Compressor	365

	Compression in the Fourth Dimension	366
	Sidechains	367
	Multiband Compression	368
	Reverberation	369
	Real Reflections	369
	Evaluating Reverbs	372
	Practical Reverb	372
	Beyond Reverb	373
	Other Delay-Based Effects	374
	Vocal Elimination	375
	Noise Reduction	375
	Noise Gates and Expanders	375
	Multiband Noise Reducers	376
	Noise-Reduction Strategies	377
	Combining Effects	378
	Helping the Effects Along	379
	Learning More	379
Chapter 17	<b>The Mix</b>	<b>380</b>
	Setting up for the Mix	381
	Do You Need a Mixing Console?	381
	Scheduling	386
	Before You Mix, Don't	386
	Techniques of Mixing	387
	Why We Move the Knobs	388
	The Time Dimension	390
	Hearing Two Things at Once	391
	Mix Distortion	391
	Working with Automation	393
	Preparing for Someone Else to Mix	395
	Ask the Expert	395
	Interchange	396
	What to Bring to a Mix	396
	After the Mix	397
	Dubbing and Print Masters	398
	The Last Thing You Should Do	398
Chapter 18	<b>"Help! It Doesn't Sound Right!"</b>	<b>399</b>
	Problems With On-Camera Dialog	399
	"It's Hard to Understand the Words!"	400
	Too Much Room Echo Around Their Voices	400
	Too Much Echo and Random Room Noises, but Voices	
	Seem Okay	400
	More Echo on One Actor Than on Another	400

Too Many Background Noises	401
Too Much Machinery Noise, Traffic, Footsteps . . .	401
Noise in a Radio Mic	401
Electronic Hum During the Recording	402
Dialog Problems Introduced by the Recorder	402
Playback Doesn't Sound Like the Recording	402
Background Noises Seem to Jump Around with Each Take	403
Audio is Too Quiet in the Editor. When I Boost It, I Hear Hiss and Buzzing	403
Postproduction Audio Issues	403
Lip-Sync Problems	403
Hum and Noise	405
Background Noises That Couldn't be Eliminated at the Shoot	405
Narration Problems	406
Voice-Over Recording Lacks Clarity	406
Voice-Over Sounds Fine by Itself but Is Weaker Than Other Elements	406
Computer Doesn't Play Audio Well	406
Periodic Clicking in a File	407
Random Squeaks, Whistles, or Edginess Mixed with the High-Pitched Sounds	407
Editing Problems	407
Dialog Seems Uneven from Shot to Shot During Editing	407
Music Edits Don't Sound Smooth	408
Mix Problems	408
The Mix Sounded Great on the Desktop or Mixing Studio, but Bad on the Air or in the Conference Room	408
The Mix Proportions Were Right, but It Was Too Soft/Loud/Distorted on the Air	408
Some Elements Sound Fine in Stereo, but Disappear when the Tape Is Broadcast, Played on VHS, or Seen on the Web	409
The Entire Mix Sounds Very Wide in Stereo, but Disappears in Mono	409
Other Common Questions	410
Where Can I find Cheap Talent/Music/Sound Effects?	410
Is It a Copyright Violation to Use Pop Music Recordings in an Educational or Nonprofit Video? How About Classical Music?	410
Well Then, Can I Use the Copyrighted Music in my Temporary Mix?	410
What Software Should I Use? What Brand of Sound Card? Mac or PC?	410

Appendix A	<b>Glossary</b>	<b>412</b>
Appendix B	<b>Resources</b>	<b>418</b>
	<b>Organizations</b>	<b>420</b>
Appendix C	<b>CD Contents</b>	<b>422</b>
	<i>Index</i>	429
